PROFILE

I aim to become a creative coder, social influencer and an expert pilot. I hope to fly high and inspire the youth. I am skilled in coding languages with Python being my strongest one. Learning Data Structures in more depth along with some minor projects.

SKILLS

- Web Design (Figma)
- Database (MySql)
- Coding (Python, C, C++)
- Front End Coding (HTML, CSS)
- Problem-Solving
- Data Structure (C, C++)
- Project Management
- Strong Communication
- Operating System (Linux)

PROJECT

COVID-19 MANAGEMENT SYSTEM

Concept

- Connectivity of python and MySQL.
- basic queries of connectivity and table creation
- Some modules and loop statements in python.

Function

- To store data of hospital staff, patient and doctors.
- Replacement to manual drafts to store and enter the record with security of the data.
- The data can be added, deleted, updated, counted and many more ready mate functions are made available.
- All the data is secured and can be accessed only by the staff.

SOFTWARE ENGINEERING JOB PLATFORM

- Currently working on this project.
- It is a web based application where in all the latest software related jobs will be available with the company details.
- Working on it using Agile methodology with Python, Rust, MySql.

EDUCATION

BACHELOR OF TECHNOLOGY

SRM University of science and technology

2021 - 2025

CODING PLATFORMS

-GitHub   -HackerRank

-Codechef   -GeeksforGeeks

-LeetCode

ACHIEVEMENTS

-IT Wizard Programming and Productivity Curriculum (Excellent)
-AWS academy Machine Learning Certificate
-Handball Match (Winner)
-Back to school Art Competition (Winner)
